When reading, you might notice some words written in capital letters that look different from other words. These words can sometimes be hard to say. Two examples of such words are abbreviations and acronyms. Abbreviations are short forms of words, like "Adj" for "Adjective." Acronyms are made by using the first letters of several words, like "IRIB" for "Islamic Republic of Iran Broadcasting." These short forms make writing easier to read and understand. They also help save space and avoid repeating the same words. Sometimes, writers make new acronym to name something new and make it sound interesting. This helps people remember it more easily.

Still, we should be careful when using short forms. Using too many of them can make the text harder to read, especially for people who don't know their meaning. This can confuse readers and make them lose interest. To save time and avoid looking up definitions, it's better to use abbreviations and acronyms only when needed.

Abbreviations are commonly used in everyday life, especially in texting and social media, where speed is important. For example, terms like "LOL" (laugh out loud) or "ASAP" (as soon as possible) have become generally recognized. However, not everyone may be familiar with them, so using them depends on your audience. Lastly, understanding when to use short forms can help you communicate effectively while keeping your writing clear.

50. Abbreviations and acronyms can make writing easier to read and understand.
a. True b. False

51. Abbreviations and acronyms aren't often used to save space and avoid repetition in writing.

In many cultures around the world, elders are highly respected. They are seen as the keepers of wisdom and are asked for advice and guidance in all areas of life. In Norway, a program called "Old Friends" pairs older adults with younger people for regular social activities, such as going for walks or cooking together. The program has had significant success in reducing loneliness and social isolation among older adults .According to research, Japan has one of the longest life expectancies (the length of time that someone is likely to live) in the world, with many elders living beyond 100 years. One reason for this is the respect **they** receive from younger generations. Respecting elders not only benefits the elderly but also has a positive impact on younger generations. By learning from elders, younger people gain valuable knowledge and insights that can help them manage life's challenges. For example, a study found that young people who spent time with elders had a more positive view on life and were more likely to **value** social relationships.
